3rd December 2009

Dear Darren

RE: ESD SIMULATION – SUB SEA SYSTEMS TRAINING

I would like to thank you and the staff at ESD Simulation for the very professional and thorough Sub Sea Systems training course delivered to the Operators on the Pluto Project.

The content of the course was researched well, and the graphic content was in line with the requirements we had for underpinning knowledge for industry inexperienced operators and more experienced process control operators.

Splitting the course into sections, delivering the underpinning sections first and then expanding on the established knowledge provided a good outcome for all attendees.

The course material handouts remain a "go to" resource for all when researching further into the operation of the Pluto Su Sea production wells.

Each of the participants on the course rated the course content as excellent and each commented on the knowledge of the presenter.

My thanks once again for the very professional way this course was run.

Best regards,

Ron McDiarmid
Production Training Coordinator
